The Right Course For You

This brochure provides information about the company organizing the course and the trainer delivering it. The course contents will be presented to learners and broken down into concise topics.

Our five-day Information Security Management System Lead Auditor course is designed for organizations that are planning to adopt and implement Information Security Management System based on ISO 27001:2013 or Chief Information Security Officers, Security Experts, Information Security Consultants, Management Representatives, Managers, Auditors or Lead Auditors.

By the end of the course, participants will learn information security principles based on confidentiality, integrity and availability, information security processes and controls of ISO 27001:2013 and auditing processes of ISO 19011:2018 integrated into a credible Information Security Management System.

This course will help participants to **become IRCA certified ISO 27001:2013 lead auditors.** The course materials and final test are based on ISO 27001:2013 and ISO 19011:2018 standards which can be used by organizations of all sizes across any industry or sector.

Why Choose RICI ?

We, in RICI, are keen to maintain long-term relationships with our clients. Although it might be a cliche, but we strongly believe that our relationships with clients are partnerships that can lead us to deliver the best results.

Specific Reasons

- **Support:** Full-time customer support staff as our organization is large enough to deliver and small enough to care

- **Experienced**: Our organization has been providing customized training programs to SMEs for many years.

- **Excellent trainers:** Our trainers, will answer any question you wish to ask, related to ISO standards, auditing, the challenges they overcame and the requirements for succeeding in the field of training.

- **Quality Assured Training:** RICI offers courses accredited by national and international bodies to ensure that you earn your return on training investments.

You are in Good Hands

We work with small and large companies, individuals, government agencies, universities and blue-chip companies, so you can have confidence in our ability to deliver the results you want to achieve

Information Security Management System

ISO 27001

Information Security Management System training course is a game changer

Course Overview

All organizations, whether they are public or private, profitable or charity, large or small, require an audit due to the ever-changing requirements/regulations of the industry or potential investors and other stakeholders.

An information security audit is essential for organizations that are seeking to improve in the aspects of their physical security and data security compliance, cybersecurity, credibility and continual improvement with more effective risk-based planning. Conducting information security audits is an essential management tool for verifying objective evidence of the organization's security processes, assessing how successfully security processes have been implemented, judging the effectiveness of applied security controls and to identify or reduce threats and vulnerabilities in the organization. Security Audits do not only report non-conformances and corrective actions but also highlight areas of improvement.

This 5-day course is designed for those who are pursuing a career path as Information Security Management System Auditor/Lead Auditor and for people who are already in this field and want to further improve their competence, skills and learn professional auditing techniques.

By the end of the course, participants will learn auditing principles, audit program objectives, audit planning and implementation, opening and closing an audit, and the characteristics that make a successful auditor.
