## The Right Course For You

This 5-day Business Continuity Management System Lead Auditor Course is designed for organizations that are planning to adopt and implement a Business Continuity Management System based on ISO 22301:2019, or for professionals such as business continuity strategists, managers, consultants, auditors and lead auditors.

Experienced trainers will introduce the framework and processes of ISO 22301:2019 and will ensure enhancing the learners' knowledge and understanding of the course. While taking the course, learners will acquire the competencies required in auditing, based on ISO 19011:2018, to ensure the credibility and integrity of the Business Continuity Management System.

This course is accredited by CQI IRCA, a world-renowned institute for safeguarding the integrity of training organizations and a leader in the establishment of ISO training courses. Learners will **become IRCA certified ISO 22301:2019 Lead Auditors** after successfully completing this course.

# Why Choose RICl ?

## You are in Good Hands

We work with small and large companies, individuals, government agencies, universities and blue-chip companies, so you can have confidence in our ability to deliver the results you want to achieve

We, in RICl, are keen to maintain long-term relationships with our clients. Although it might be a cliché, but we strongly believe that our relationships with clients are partnerships that can lead us to deliver the best results.

## Specific Reasons

- **Support:** Full-time customer support staff as our organization is large enough to deliver and small enough to care
- **Experienced:** Our organization has been providing customized training programs to SMEs for many years.
- **Excellent trainers:** Our trainers, will answer any question you wish to ask, related to ISO standards, auditing, the challenges they overcame and the requirements for succeeding in the field of training.
- **Quality Assured Training:** RICl offers courses accredited by national and international bodies to ensure that you earn your return on training investments.

# Business Continuity Management System

## ISO 22301

Business Continuity Management  
System training course is a game  
changer

## Course Overview

The tenacity of businesses to continue their operations amid market and technological revolutions, natural disasters, pandemics, cybercrimes, strikes is paramount for any organization interested in sustaining their clientele and ensuring steady growth, regardless of its size, location or sector.

Business Continuity Management System audit is the optimal management tool for acquiring a comprehensive understanding of the organization's business continuity strategies and plans. Through the verification of objective evidence, the effectiveness of existing processes is assessed, risk assessment and business impact analysis are conducted, areas of improvement are discovered and opportunities for loss mitigation are validated. Audits not only report non-conformances and corrective actions but also highlight the positive effects of existing practices, making it quite simple for departments to share information and amend their work practices, contributing to continual improvement.

This 5-day course is designed for those who are pursuing a career path as a Business Continuity Management System Auditor/Lead Auditor and for individuals who are already in this field and want to acquire further knowledge and skills.

By the end of the course, participants will have obtained a comprehensive understanding of auditing principles, audit programs, audit objectives, audit planning and implementation, opening and closing an audit, and all the characteristics and personality traits that make a successful auditor.
