## The Right Course For You

This 5-day Occupational Health & Safety Management System Lead Auditor Course is designed for organizations that are planning to adopt and implement Occupational Health & Safety Management System based on ISO 45001:2018, or for Health & Safety engineers, managers, consultants, auditors and lead auditors.

Experienced trainers will introduce the framework and processes of ISO 45001:2018 and will ensure enhancing the learners' knowledge and understanding of the course. While taking the course, learners will acquire the competencies required in auditing, based on ISO 19011:2018, to ensure the credibility and integrity of the Occupational Health and Safety Management System.

This course is accredited by CQI IRCA, a world-renowned institute for safeguarding the integrity of training organizations and a leader in the establishment of ISO training courses. Learners will **become IRCA certified ISO 45001:2018** Lead Auditors after successfully completing this course.

# Why Choose RICl ?

## You are in Good Hands

We work with small and large companies, individuals, government agencies, universities and blue-chip companies, so you can have confidence in our ability to deliver the results you want to achieve

We, in RICl, are keen to maintain long-term relationships with our clients. Although it might be a cliché, but we strongly believe that our relationships with clients are partnerships that can lead us to deliver the best results.

## Specific Reasons

- **Support:** Full-time customer support staff as our organization is large enough to deliver and small enough to care
- **Experienced:** Our organization has been providing customized training programs to SMEs for many years.
- **Excellent trainers:** Our trainers, will answer any question you wish to ask, related to ISO standards, auditing, the challenges they overcame and the requirements for succeeding in the field of training.
- **Quality Assured Training:** RICl offers courses accredited by national and international bodies to ensure that you earn your return on training investments.

# Occupational Health & Safety Management System

## ISO 45001

Occupational Health & Safety Management System training course is a game changer

### Course Overview

Organizations are becoming more interested in establishing an Occupational Health and Safety Management System to achieve certain outcomes such as providing a safe and healthy workplace, preventing work-related injuries and ill-health and to proactively improve the health and safety performance. It is mandatory to consider Occupational Health and Safety when enacting business decisions or establishing strategies.

Conducting health and safety audits is the optimal management tool for verifying objective evidence, assessing the effectiveness of processes, evaluating existing hazard identification and risks assessment, identifying areas of improvement and analyzing opportunities for the reduction of incidents and accidents. Audits not only report non-conformances and corrective actions but also highlight the positive effects of existing practices, making it quite simple for departments to share information and amend their work practices, contributing to continual improvement.

This 5-day course is designed for those who are pursuing a career path as Occupational Health and Safety Management System Auditor/Lead Auditor and for individuals who are already in this field and want to acquire further knowledge and skills. Learners will become more familiar with other well-known health and safety standards and some local compliance requirements.

By the end of the course, participants will have obtained a comprehensive understanding of auditing principles, audit programs, audit objectives, audit planning and implementation, opening and closing an audit, and all the characteristics and personality traits that make a successful auditor.

## Topics Covered

Overview of the ISO 45001:2018 standard, process approach, risk-based thinking, PDCA Cycle, Annex L structure

Auditing hazard identification

Auditing risk management

Auditing emergency preparedness and response
